

Alvin Mao (andrew id: asmao) (product owner)

Kevin Dou (andrew id: khd)

Sprint Progress Report

Due: 11/17/14

Team: ASM Simulator (team name in github: Team101) Final Sprint

Our overall goal for this final sprint is to incorporate all the remaining features in our product backlog. Those features are listed below:

Task Number	Assignee	Description
1	Alvin	Integrate ISA into web server.
2	Alvin	Implement breakpoints.
3	Kevin	Have the file IO working. For details reference sprint 2 progress report.
4	Kevin	UI. We got numerous complaints in our sprint presentations about polishing up the UI. This has now been greatly elevated in terms of priority.
5	Kevin	Configure the web server (heroku).
