Sprint Backlog
Due: 10/30/14

Team: ASM Simulator (team name in github: Team101) Sprint 1

Our overall goal for the first sprint is to complete all the profile features as well have have the HTML template for the IDE page written. In short, everything except for the processor that interprets the assembly and the compiler that disassembles the assembly should be configured.

In accordance with the product backlog, here are how the responsibilities will be partitioned (check the product backlog for references as to what the numbers stand for).
